

# ISC SUSPENSION

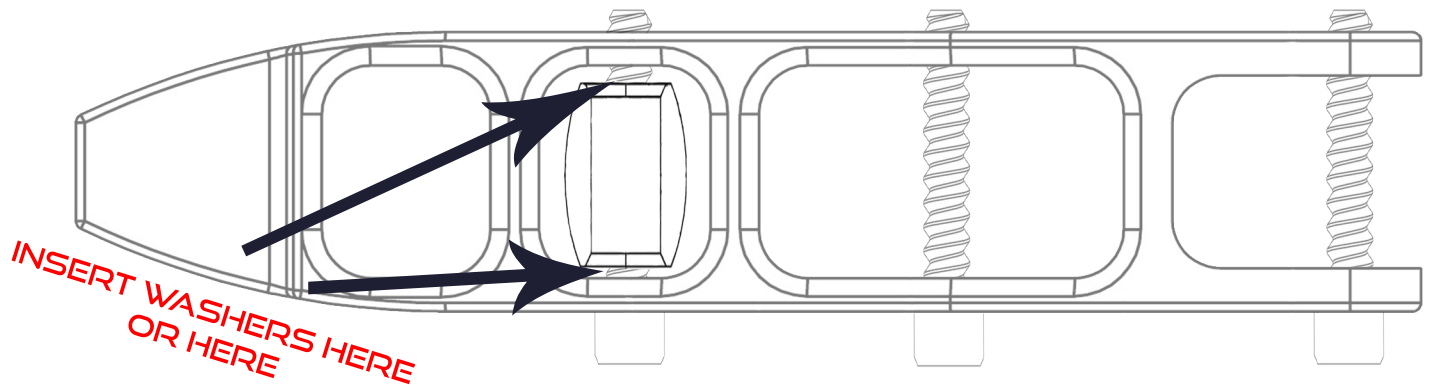

**CONTROL ARM HARDWARE (X6)**

# ISC SUSPENSION

Due to manufacturing differences with some endlinks, you may need to use the supplied washers to help secure your endlinks or strut if there is any side to side play.

1 or 2 washers may need to be inserted on either side of your endlinks, shown below.

Grease is included with the control arms . To apply, remove the pillowball inserts and using a flat head screw driver, lift the rubber seal and squeeze the grease onto the pillowball. repeat for both sides of the pillowball.
